THE IMPROVEMENT OF THE OHIO RIVER. - We alluded a few days ago to the bill pending in Congress to provide for preliminary surveys with a view to the adoption of some plau for the improvement of the Ohio river at the expense of the General Government. The bill, which was introduced by Mr. Pugh, of Ohio, appropriates \$50,000 for a topographical and hydrographical survey of the Ohio river and its tributaries to determine the practicability of establishing the reservoir system suggested by Mr. Elleg a Capt. Humphreys and others. It also apprepriates \$20,000 for the completion of the neces sary surveys and examinations to ascertain the practicability of improving the navigation of the Ohio river by a series of dams and slack-water

Mr. Bigler, from the Committee on Commerce, accompanied the bill with an able and interesting report, urging the very great importance of the improvement of the Ohio river and strongly recommending not only the passage of Mr. Pugh's bill providing for these preliminary surveys but the final adoption and execution, at public cost, of the one of these plans presented which may be found to promise the most success.

We make the following extract from this report:

Seven great States [Pennsylvania, New York, Virginia, Ohto, Kentucky, Indiana, and Illinols] are washed by this river or drained by its tributaries, each of which is more or less interested in its free and constant navigation. And to this number, indeed, we night justly add the States of Tennessee and Alabama, as joint owners of the navigable portions of the Tennessee and Cumberland rivers, making in all a family of time States, containing a population of not less than fifteen millions, being more than one-half of the aggregate population of the United States. To trace the influence of this chanuel of trade through all its ramifications would be a difficult if not an impracticable task. It is feit with peculiar force at all the ports on the Southern and Western rivers, covering a connected steam navigation of more than sixteen thousand miles, the most widely separated exchanging their products at short intervals. The city of Pittsburg alone, situate at the eastern extremity of the Ohio, to say nothing of her vast manufactures, sends out annually on this long line of travel from fifty to sixty new steamers, in the South, as with lowa, Wiscousin, and Minuesota, in the We t; their pilots becoming equally familiar with the channet amoug the stumps on Red river or the rocks of ye Upper Mississipei.

May's 'sthe affety ciaimed, then, in view of the foregoing facts, that if the navigation of the Ohio river be not mational in its characteristic and consequences, and its incorporate that he work is too greatfor individuals even if possessed the necessary jurisdiction over the river, if otherwise prepared of the right to dut, is clear; and no State possesses the necessary jurisdiction over the river, if otherwise prepared to accomplish the end; hence the application to the General Government.

That this subject was introdued into the Senate upon We make the following extract from this report:

This subject was jutrodued into the Senate upon a memorial of the Pittsburg Board of Trade asking an appropriation of public lands in aid of a conspany chartered or to be chartered by the States bordering on the Ohio river to improve its navigation. The company alluded to is the one chartered last winter by the State of Pennsylvania. It proposes buried, were of course charged with this rank of to improve the river by the system of dams and slack-water pools. The report is unfavorable to this plan. With reference to its utility the report says:

plan. With reference to its utility the report says:
Against this scheme a variety of objections have been
riged, such as that it will require the construction of fortyfive or fifty high dame, costing a very large sum of money,
liable to constant decay, and to be swept away by the
floods; that the locks could not have the capacity to pass
the number of crafts that would be presented at certain
periods; that it cannot be introduced as a whole system, and
that the derangement of any part of it would arrest the
whole. The committee are not prepared to unige of these
objections; but it obviously proposes a very violant interference with the natural laws of the navigation, and in
doing this it may possibly invade the rights which all have
to the free use of the natural navigation of the stream.
The devending konnage, in the shape of lumber, fron,
coal, and other products might be rendered laste to nuwarrantable interruption, and consequent increased cost of
transportation. The effect of the dams on the Susquehanal, and other products might be rendered matter to user making interruption, and consequent increased cost analysisation. The effect of the dams on the Susqueha a, at different points, for the purpose of feeding the Pen trania canals, have idustrated, to some extent, the cheer of this objection. In works of this kind, the agent art, it is evident, should, as far as practicable, conforme laws of nature, acting with, rather than usurying, the nations. But this mode of improvement has many intentions. But this mode of improvement has many intent advocates and inviting characteristics; but the deticable actions are active to a committee, it outso Insufficient to warrout. efore the commutes a pinion as to its utility.

The specific prayer of the memorial for a grant of public lands in aid of an incorporated company is thus disposed of:

So fit is concerns the constitutional right of Congress to donate. Dic lands to a corporation for that purpose is concerned, the committee do not care to pass upon the question. The circumstances surrounding the proposition of the Board of Trade render this unnecessary. No company for the purpose contemplated has been brought into full existence. The only step in that direction, so far as the committee can discover, is an act by the Legislature of Pennsylvania incorporating a company to improve the

navigation of the Ohlo river, and vesting the corporators with very wide discretionary power over the subject, with the right to construct dama, locks, canals, or any other artificial works which may be deemed proper, and to tax the tounage of the river to a limited extent to pay expenses.

artificial works which may be deemed proper, and so tax the tourage of the river to a limited extent to pay expenses, &c.

It is not pretended, however, that this act can be made available outside of the limits of Pennsylvania without the concurrence of the other States bordering on the river; now will it be claimed that it would be wise to commence a system of improvement that did not embrace the navigation in its full extent; most certain it is that the General Government could not consent to aid any partial evices plan. The Ohio is a national highway, and no single State can claim jurisdiction over it, or pretend to the right to disturb the flow of its waters, to regulate the transportation of tax the commerce that floats on its surface.

The assent of the States of Ohio, Virginia, Kentucky, Indiaua, and Illiuois must, therefore, be had to the legislation of Pennsylvania before it can be available for the object intended. Until then it would seem to be unnecessary to pass upon the question of donating public lands to an embryo corporation which may never be vested with sufficient anthority to prosecute the object designed by its founders. Did this concurrent legislation depend upon the action of a single State, it might be anticipated with some measure of confidence, but where so many are to be consulted, and such was and varied interests considered, and the result most be quite too nneertain to he made the basis for Important Congressional action. The committee, with the utmost anxiety to accomplish the unit object of the board of trade of Pittsburg, do not feed at liberty to submit a proposition to the Senate which could not be sustained.

The report very evidently favors the reservoir plan, and it must be admitted that the objections urged against the system of locks and dams to be erected by a private company are entitled to consideration. It is important that all the plans suggested should be maturely considered after ample information has been obtained, and we hope this preliminary examination will be made at once and the enterprise in some shape perfected. We cordially agree with the chairman of the Senate Committee on Commerce, that, "if this improvement be not a fair subject for national care and aid, then no such subject can be found within the broad limits of the United States of America."

THE PREVALENT ODOR THROUGH THE CITY .-We do not think that Cologne, the quaint old town upon the Rhine, rendered so famous by the poet Cole- an earthquake. ridge's versified account of its forty-odd rank and disgusting smells, could have exceeded in odorous disagreeableness this goodly city of ours. For a week past, Louisville has smelled to the very heavens. A peculiar, scarcely definable and nauseating perfume has assailed all of our olfactories. It has been particularly offensive at night, and most prevalent and penetrating in those places where it was least acceptable. In church it has interfered with the incense of prayer and devotiou. In the playhouse it has well nigh stifled actors and audience. In the concert room it has marred melody and music. In the parlor it has produced unpleasant thoughts and provoking suspicions.

Everybody, indeed, has been sadly perplexed with this unaccountable and unseen enemy to good appetite and comfortable existence. Innumerable use wives have been put to their wit's end to rid their premises of the stench, and have cleaned and scraped and scoured their pantries and chambers and cellars in order to arrive at a state of purification. But all in vain. The poor rats, dead and fense against good taste. They have been cursed no little, and several wholesale merchants on Main street were at heavy expense in cleaning out their stores and moving all of their goods in order to ascertain definitely the number of unfortunate de ceased rats.

A solution has, however, at last, been found for this odorous problem. All the horrid stench emanates from the gas that so brilliantly illuminates our streets and buildings. That is the head and front of all offending. The Gas Company has been compelled recently to use Evansville coal in the manufacture of gas. Its compouent parts are very different from those of the Pittsburg, being quite interior, and bence the sufferings endured by the proboscises of our citizens. But there was no alternative for the Company other than the stoppage of the supply of gas, or the use of the Evansville article. They acted the part of wisdom, for gas-light is an indispensable luxury, although it may and does sometimes partake of the smell of assafætida:

THE MURDER OF DR. BURDELL .- The city of New York has been for some time in a perfect uproar of excitement upon the subject of the murder of Dr. Burdell. Nothing else seems to be talked of or written of or thought of or dreamed of in the great Gotham. As the Cincinnati Commercial says, 'Multitudinous columns of the mammoth journals of the inctropolis are filled with accounts of the murder of Dr. Burdell. Diagrams of his building, sketches of his life, descriptions of his person, the lives and adventures of all persons intimately connected with him, testimony concerning the circumstances of the discovery of the body, the disposition of the furniture, details of the post mortem examination, elaborate guesses at the facts of the murder, occupy the news columns of the papers, while the leading editorial columns are filled with the theories, surmises, and philosophisings of the leading editors."

For our own part, we cannot well understand why all this terrible commotion has been got up about the murder of an individual in New York. To be sure Dr. Burdell is said to have been worth a hundred thousand dollars, but no one pretends that he was at all distinguished for his talents or any uncommon virtues, or that he even occupied a high social position. Men, not less worthy than he is presumed to have been, are murdered continually iu New York with the pistol, the knife, the slung-shot, and the garrote, and their dead bodies are found upon their own door-steps or at the corners of the streets, and the whole matter is passed over with a paragraph in the newspapers, and the mystery of the iniquity remains forever unfathomed. Undoubtedly the murder of Dr. B. was atrocious, but we do not see why the population of a great city, with the cry of murder nightly ringing in their ears, should pass over a hundred murders to convulse themselves so fearfully over one.

It is very easy to see, that, if the individuals to whom the finger of suspicion in New York is now pointed as the perpetrators of the murder or participator's in it shall be brought' to trial, there will exist scarcely the shadow of a possibility of a fair trial before an honest jury. Scores of columns of the huge journals of New York have been filled day after day with the details of all the testimony before the coroner's jury and with the arguments and the impassioned declarations of the editors as to the guilt of this, that, or the other person. If there were no strong public excitement, these publications would be a matter of less consequence, for then thousands and tens of thousands would neglect to read them, but, in the present roused condition of public feeling, all read them, and all to a greater or less extent, and generally to the greatest possible extent, make up their minds in relation to the guilt or innocence of the parties implicated. If they were to read no details or arguments, but merely to hear rumors passing from month to mouth through the streets, it might matter little, for their minds would be left by the myriad of vague and contradictory oral rumors in a state of doubt not at all unfavorable to a faithful investigation of facts and a perfectly impartial decision; but, when men read the testimony and the strong comments of the ablest writers in the community, accompanied with fierce declamation, it is in the nature of things impossible or next to impossible that their minds should not be strongly biased. We have no doubt that the minds of the whole reading population of New York are now definitely made up as to the guilt or innocence of the persons committed for Dr. Burdell's murder. The consequence must be, that, when the time shall arrive for the obtaining of a jury to try the question of their guilt, every honest and conscientious man, upon being asked whether he has made up his mind, will answer that he has, aud of course not be allowed to serve. None but structed. perjured villains will answer otherwise. Hence the jury, if there be one, will consist of twelve base and infamous men; and to that jury will be confided the vindication of the majesty of the law in a The Guthrie leaves Pittsburg to-day with a tow case that is agitating New York as by the might of We refer to the card of Messrs, Crittenden & Bro

FOUND DEAD .- The Martiusville (Ind.) Monitor says that on Friday morning last a German named George Renner was found dead about a mile from that town. When found he was lying doubled up beside a log, his face and clothes being saturated with blood. Upon examination no bruises could be found upon his person-the hemorrhage having been from the nose. It is supposed that he died in an appolectic fit, caused by excessive intoxication. He leaves a wife and two children.

IMPORTANT TO NIGHT-WALKERS .- Judge Johnston announced yesterday in the city court that, if the police would arrest all persons found walking about after 1 o'clock at night, he would hold them to bail to be of good behavior, unless some valid excuse was offered for keeping such unseasonable hours. Young gents who are in the habit of running all night and not going home until morning will please make a note of this order of His Honor and keep within doors.

High School Exhibition.—The exhibition exercises at the Male High School last evening were of an exceedingly interesting character. Professor Hailman's classes in the modern languages were examined with great credit to their talents and the attainments of the preceptor.

To-night the students in Latin and Greek are to be examined, and several original and selected declamations will be delivered. We hope to see a full attendance at the University building.

MUNICIPAL BUSINESS .- The General Council held its regular weekly session last evening. But little iuess of importance was transacted. In the Board of Aldermeu, the ordinance granting aid to the company concerned in developing the Grayson coal tields, was deferred until the next meeting.

Mr. L. H. Rousseau was elected a member of the Board of Aldermen, from the Sixth Ward, in place of F. A. Kaye, Esq., resigned.

RIVER AND STEAMBOAT MATTERS.

The river was falling last evening with 8 feet 8 inches water on the falls. There was very little ice running, but it will be seen from our Cincinnati dispatch that there is more coming. The weather has however moderated very much, and the sky had every appearance of rain. If this continues the ice in the river will be softened and offer but little impediment to navigation.

Four steamers left for New Orleans last evening laden to the gnards. The R. W. Adams, Captain Marshall's new steamer, is here yet, and she will start this morning. The Adams has splendid accommodations, and Capt. Marshall and his clerks Messrs. Richeson and Martin, are gentlemen who bestow every attention on travelers. The Adams lies at the foot of Second street.

The Wm. M. Morrison, a No. steamer built at Cincinnati for the St. Louis trade for Capt. Boffinger is expected down to-day and will also leave for New Orleans. The Morrison is said to be a splendid craft.

He escaped the penalties of the law in couse quence of the indictment, which was dated June, 1856, charging that the offense was committed in November, 1856, five months afterward.

MR. SUMNER.-By letters received at Washington from Mr. Sumner, it appears he persists in returning to his seat in the Senate, against the advice of his friends, if only for a few days. He is expected to make his reappearance in his seat next week, though it is announced to be his intention to sail for Europe on the 1st of March.

SUGAR-CURED HAMS .- In our commercial column is noticed the sale of 1,000 sacks of Atkinson, Thomas, & Co.'s sugar-cured hams, for the New York market, prepared by Mr. Lewis Stagg, formerly of Cincinnati. Mr. Stagg has gained a wide reputation in the preparation of sugar-cured hams, and they are sought for here as well as in Europe.

THE AMERICAN CHURCH MONTHLY FOR FEBRE-ARY 1857 .- The second number of this journal well fulfills the high promise of its predecessors. One sentence from the article entitled "Grounds of Unity," is a gem sufficiently bright to illustrate a whole magazine:

C. T. D. Yours truly,

[Special Correspondence of the Lonisville Journal.] ouisville and Portland Canal-Two Old Fogies-Indiana Senator, etc.

WASHINGTON, Feb. 10, 1857.

Several days ago you were informed that the subject of the enlargement and improvement of the Louisville and Portland canal occupied the attention of the committee on commerce in each House of Congress. In both a strong desire is manifested

or consummate the plans heretofore suggested.

Mr. Slidell of the Senute has submitted, from his committee, a bill coutaining the following features:

1. The Louisville and Portland Canal shall be improved in the manner hereinafter stated. The canal as it now exists to be widened so that it shall be the probability of the state canal as it now exists to be windened so that it shain be one hundred feet wide in the water-way and its channel depth made uniform and sufficient for the passage of any boats which can navigate the river in low water above and below the falls, and two basins to be formed in the canal for the purpose of permitting boats to pass, not less than one hundred and security five feet wide and four hundred and permitting boats to pass, not less than one hundred and aud seventy-five feet wide and four hundred and fitty feet long. There shall also be made a branch to the canal, of width and depth corresponding with the residue, when improved as above provided, which shall leave the present canal at dry dock, and enter the river below the rocks, near the foot of Sandy Island; which hranch cannal shall be furnished with one or two life-locks, at the foot eighty feet wide and four hundred feet long in the chamber. There shall also be placed at the head of the canal a proper guard-lock and gates, and along its line two draw guard-lock and gates, and along its line two draw or other pivot bridges, provided however that the improvements be made in such manner as to cause

improvements be made in such manner as to cause the least possible interruption to the navigation of the canal while they are in progress.

2. The present rates of tolls shall continue as at present fixed by the Secretary of the Treasury, and the money raised from them, after paying the necessary expenses of the management, shall be appropriated and used in improving and maintaining the work; but after the improvements shall have been completed, the rates of tolls shall be reduced to ten completed, the rates of tons shall be reduced to ten cents per ton for steam vessels, and proportionate rates for other craft, unless a greater amount be necessary to pay for managing and keeping the canal in repair and to improve the same.

3. The canal shall remain a public work for the accommodation of all vessels and craft desiring to

ise it, under the control and direction of the Secretary of the Treasury.
This is not exactly such a bill as it was anticipat-

d the committee of the Senate would report; but doubtless the gentlemen there having it in charge thought it would be a better measure than one drawing money from the National Treasury for that ourpose, especially as the President of the United States is known to be much given to vetoes of such oills. This steers clear of the heretofore annunciated constitutional objections to similar works of inernal improvement.

In this connection, it is proper to state that the House Committee on Conuerce are willing and favorable to a direct appropriation of \$500,000 toward the canal improvement; and I learn that Hon. Humphrey Marshall has a bill providing for the improvement in a manner similar to that in the Senate bill; but proposing the above named amount of money to continue the work.

continue the work.

The Senate till will be acceptable, provided that the funds caunot be procured from "money in the Treasury not otherwise appropriated."

Very much fun was enjoyed in the Senate yester-day—a pleasant little interlude to the dry debate on the question whether Mr. Fitch, of Indiana, should e sworn in as a Senator from that State. Butler, a venerable snow-white headed gentleman with a ruddy face, and of an extremely nervou temperament, was "laying down the law," and proudly proclaiming that he was an "OLD FOGY." when Gen. Cass, the senior of Judge Butler, hastily left his seat, and at a bound was at the side of his riend, convulsively shaking his hand, in approba-tion of the declaration, and as much as to say, "I'm with you, old fel." Here were two "old fogies," hand in hand, presenting a novel spectacle, and affording to the members of the Senate and the crowded galleries an occasion to indulge themselves in loud and prolonged laughter; the ancient twain, meanwhile, enjoying themselves extravagantly while in fraternal junction.

while in fraternal junction.

Dr. Fitch was permitted to take his seat in the Senate, on the ground that his credentials were primatacle evidence of his election; but these and the protests of the two branches of the Indiana Legislature will be considered by the proper committee

Jealousg and Blood'-Last evening, a female with a flushed face and quick step unight be seen unoving hurriedly along Calliope street, and when near Tchoupitonlas she turued into a house, which, in a moment after, was the scene of a most fearful tragedy. The woman was Mrs. Mary Cull, and the house she entered was the temporary abode of her husband and her husband's alleged paramour, one Margaret Kelly. As Mrs. Cull entered the house and attempted to pass into a rear room in quest of her husband, Margaret Kelly sprang before her, and grasped her by the throat, and as she did so, Mrs. Cull drew a knife and plunged it into her heart, thereby killing her on the spot. Thereupon a citizen, who was attracted to the spot by the noise of the occurrence, entered, and seeing Mrs. Cull standing over the prostrate body of her victim, took her into custody, and conveyed her to the First District lockup.—N. On and after the 15th iust., the price of the Bulletin will be 121/2 cents per week. The heavy expense of telegraphing, and the expense of publishing as much matter as we do in the Bulletin is a sufficient apology for increasing the price. It is hoped all in arrears will settle promptly with Mr. Barker, who is alone authorized to collect for the Bulletin and half-sheet Journal.

BLACKWOOD .- The January number of Blackwood is one of unnsnal power and attractiveness. It opens with the first part of a new tale, entitled "Scenes of Clerical Life," which, if executed in the manner of this installment, will prove as finished and fascinating as the most brilliant of its predecessors in the same pages. Mrs. Browning's last and greatest poem, "Aurora Leigh," is criticised in a paper of more spirit than depth or acumen, but still of exceeding vigor and felicity. Those who know and love Mrs. Browning best will probably feel that her most subtle yet most resistless charms have escaped the strong grasp of the critic, while those who know her least or not at all will be stimulated by his involuntary praise to know her more. Part VII of "The Athelings, or the Three Gifts," is worthy of the charming series in which it appears. The article on "New Facts and Old Fancies about Sea Anemenes," is full of information and quiet enchantment. Of the remaining articles, the concluding one on "European Politics" is especially able and graceful, although the writer does use the verb beware in a transitive sense, and perpetrates one or two faults of arrangement which look like blots in the perspicuous pages of Maga.

We know of no better occasion than the present to call the special attention of our readers to Scott's American republication of Blackwood and the world-renowned British Quarterlies. It is of course unnecessary to say anything in their praise. No man is entitled to think himself on a level with the thought and intelligence of the age who does not read them. They are the expression, and, in many respects, the best expression, of the largest and ripest intellects of our time. The extraordinary cheapness with which the American republicatious are formished places this rich and glorious fruitage of modern mind within easy reach of everybody. Nobody that is anybody can or ought to eschew it. The terms are as follows: For any one of the four Reviews, \$3 00 per annum; for any two, \$5 00; for any three, \$7 00; for all four of the Reviews, \$8 00; for Blackwood's Magazine, \$3 00; for Blackwood and three Reviews, \$9 00; for Blackwood and the four Reviews, \$10 00. Payment to be made invariably in advauce. Address Leonard Scott & Co., Publishers, 79 Fulton street, New York.

In the meantime, the January number of Blackwood, and a thousand other new and racy literary things, may be found at Kirk & Clarke's, Mozart building, Fourth street.

An exhibit of the militia of the several States and Territoriez, taken from the latest returns that have been received at the War Department, has been communicated by that Department to Congress. The returns are by no means complete. There has been no return from Delaware since 1827, and from Maryland since 1838; and for several years from a number of other States. The aggregate number of men is 2,716,094. This, however, does not include the State of Iowa, and the Territories of Oregon, Washington, Nebraska, Kansas, and New Mexico. The highest number in any one State is in New York, reaching 337,235; the next 257,420 in Illinois, aud the next 209,126 in California. Maryland had 46,864 in 1838, and Virginia 125,531 in

RESTITUTION .- On Monday last the President and the Cashier of the Georgia Railroad and Banking Company, at Augusta, Ga., each received a letter announcing the interesting fact that two thousand and eighty-one dollars, the property of the company, had been scat them by Adams's Express. This turned out to be true, and the amount was duly handed over. There was no further indication of the source from which the money came than is given in one of the notes, dated Augusta:-"I have sent to you, by Adams's Express, two thousand and eighty-one dollars (\$2,081) the property of the Georgia Railroad and Banking Company."

WORTHY OF IMITATION.—They deal summarily with remiss policemen in Savannah, Georgia. During the present week one of them was charged with not being at his post, going off his "beat," and using scurrilous language. He was fined \$10 for the first, \$20 for the second, and suspended for the third offeuse. Another was charged with going off his division without leave and being intoxicated. He admitted he went and took a drink or two with a few friends he met from the country, instead of going to supper; but that he attended as usual at his post. He was discharged from the service.

THEATRICALS ON RED RIVER .- The Alexandria American has the following account of the manner in which they perform tragedy down on Red river A tragical affair occurred in this eity on Saturday last between Miss Grace Greenwood and Mr. W. E. Anderton, who were members of the theatrical company which have been giving nightly exhibitions in our city for the past three or four weeks. The origin of the difficulty seems to be as follows: Friday gin of the dimetrity seems to be as follows: Friday night last was set apart by the manager, Mr. Charles, for the benefit of Miss Greenwood, but owing to some cause or other the exhibition did not take place; she blamed Mr. Auderton for it, who, she hald, had dismissed the assembly without authority.

On Saturday morning the enraged lady purchased over of those necessary implements of female war-

our of those necessary implements of female war-fare, viz: a cowhide of lengthy proportions, and commenced a search for the above named gentleman, and, after perambulating the streets of the town for about four or five hours with the aforesaid weapon concealed under her shawl, she suddenly come across him at or near the ice-house and com-menced applying the cowhide to the back of the aforesaid gentleman, who jerked the same from her, when she immediately drew her knife and made a ferocious attack with that weapon upon him. He fluully succeeded in wresting the knife from her, but not before he had received a number of cuts, one of which was considered dangerous at the time. But we are happy to state that he is now out of danger and will probably be able to be out again in a few days. Mr. Anderton did not attempt to strike the lady we believe, and the only resistance made by him was to get possession of the weapons which the earaged lady used so profusely on him. We do not pretend to say which of the above parties is to blame in the affair. Miss Greenwood left town that night on the stage for the mouth of Red river and has not been heard of here since.

An Escape. - Three elderly and respectable ladies An Escape.—Three enterly and respective ladies were arrested at Detroit for the supposed murder of a German peddler, and their house being searched hones and blood were found, thus circumstantially satisfying the charge. In the midst of the exciting trial the peddler forced his way up to the judge and protested he had never been murdered. The ladies of course were at once discharged.

A LARGE PROFIT .- The annual statement of the Louisana State Bank, says the Crescent, shows:

The annual statement of the Louisiana State Bank by which it will be perceived there is a nominal surplus of seven hundred and two thousand dollars. From this surplus the dividend declared on Saturday last—say 6 2 cent., or \$120,000 is to be deducted.

The net profits of the Citizens' Bank, for the last 6 months, are \$207,000, or within a fraction of 14 \$\frac{1}{2}\$ cent., which carries a large sum to the reserve fund. The recent dividend of 6 \$\frac{1}{2}\$ cent. is payable on the

AMERICAN COLPORTAGE—A GREAT PROVIDEN TIAL EXPEDIENT FOR THE EVANGELIZATION OF OUR FRONTIER SETTLEMENTS.

AMERICAN COLPORTAGE—A GREAT PROVIDENTIAL EXPEDIENT FOR THE EVANGELIZATION OF OUR FRONTIER SETTLEMENTS.

Having labored for nearly thirty years over most of our States, and witnessed from its commencement the practical operations of the Colporteur work, may I be permitted to present for the encouragement of its friends a brief survey of the vital importance and increasing mediulness of this great enterprise? While every friend of Education and Christianity regrets the utter impracticability of speedily and rally supplying our new States and Territories with a thorough educational system, and with an able and faithful ministry, it is a matter of rejoicing and encouragement that our admirable and popular system of colportage has for several years past been reaching our most destitute population in thirty States and Territories, with books of high intellectual and religious character, and by the agency of intelligent Cbristian laborers, whose warm-hearted personal appeals have given fresh power to the historical appeals have given fresh power to the historical lack of ministerial service.

In prosecuting the great work of the American Tract Society, its colporteurs have, from the commencement of their labors, visited from house to house, including revisitations, more than twenty millions of our inhabitants, and including a large portion of those scattered over our tronter settlements, making an affectionate and instructive Christian visit in every dwelling, selling the best of books at about cost prices, giving to the destitute, establishing Sabbath Schools in hundreds of places, and supplying them with books, dving a new inspiles to the cause of Christian education; calling up the attention of the people to the service of the providence of the form of the second our destitute countrymen; cubraces of necessing militors of our common Christianity which constitute the stability, safetr, and slory of our Republic.

A work so visal to the best interests of our common comprise to our pastors and disselonaries; in a hear

Rejoicing in the extent and usefulness of this great enterprise in the past, do we not need still greater enlargement for the future? With a territory large enough for four hundred and fifty States of the size of Massachusetts, and capable of sustaining one half of the population of the globe, and with hundreds of thousands of emigrants annually fleeing to us from the poverty and despotism of the old world, to enjoy this good land flowing with milk and honey, how important to pre-occupy all our frontier settlements with our educational and Christian institutions, before the enemy shall take possession of them. While our foreign hrethren have been earning hundreds of millions for usin the development of our national resources, constructing our canals, railroade, etc., shall we not make haste to give them the best returns in our power, in that intellectual and religious culture, which shall fit them to become good members of our body politic and our Christian churches. oicing in the extent and usefulness of this great enter-

intellectual and religious culture, which shall fit them to become good members of our body politic and our Christian churches.

Having hundreds of new counties and frontier settlements, very partially supplied with preaching, urgently demanding colportear labor, and inundreds of intelligent Christian men who may be found to enter upon the colportear work for the small compensation of \$150 or \$200 a year, why shall they not at once be sought out and sent forth Into the great field already white for the harvesty Many of our generous citizens have, for years past, paid \$150 each for the salary of a colporteur, and many single churches have sent forth a baborer, while a few of our wealthy congregations have contributed annually \$1.000, 2,000, and 3,000 for the colporteur work. And why, with a corresponding liberality over our whole country, may we not, during the prosperous year upon which we have now entered, send forth a devoted laborer to every needy country and district in our land? Shall there not be such a nonlinitee in New York shall be encouraged to enter at once upon the accomplishment of the work?

Is not a bountiful Providence pouring in this unparalleled tide of prosperity upon our country, not to make a proud and luxurious, but to give us the ability and disposition to enlighten and bless our country. Has not God reserved the discovery of this country until these better days, in order to rear up here a great Christian itepublic, to be the lighthouse of the world—to work out the great exeriment of civil and religious liberty for all nations? Has here ever been a nation hefore us having such a mighty work to do, and such wonderful facilities and vast resources for its accomplishment? As God has given us a great and good land, great lakes, rivers, and mountains, great and good land, great lakes, rivers, and mountains, great and good land, great lakes, rivers, and mountains, great and good land, great lakes, rivers, and mountains, great and soot have a great unational heart, great patriotism, philanthropy

The Griswold Affair Agan.—Moses W. Hawkes, late partner of S. N. Griswold, in this city, was arrested in Toronto on the 5th inst. On the insolvency of the firm, Griswold and Hawkes made away with a large portion of the stock of jewelry, and proceeded to leave Chicago as quietly as possible. Hawkes undertook to convey the wife of Griswold and her two children to Connecticut, to her father's residence; but he brought the woman through Canresidence; but he brought the woman through Canada, living with her as his wife, and finally settled
down at a hotel in Roxbury, near Boston. There
Griswold found the guilty couple, but the woman
adhering to her paramour and alleging her detestation of her husband, no legal steps were taken. The
whereabouts of the parties was made known, however, and Griswold was arrested by his New York
creditors, but llawkes made his escape to Toronto.
An auonymous telegraphic dispatch was sent to Chicago aunouncing his presence there, and detective cago aunouncing his presence there, and detective officer Williams went after him. Hawkes was arrested .- Chicago Press.

SENTENCE OF DEATH UPON A YOUNG WIFE .- The Quebee papers contain a report of the proceedings at the Court of Queen's Bench in that city, on the oc-casion of the sentence of Anais Bisson, a young woman of about twenty-two years, convicted of poisoning her husband, to whom she had been married but a few months.

The prisoner seemed much affected while the awful e was being pronounced, and sobbed the

whole time.

When the Judge had concluded speaking, the Clerk of the Crown asked the prisoner if she had anything to say why execution should not be awarded according to judgment.

The prisoner, who was still crying, answered, "I am not guilty," (Je ne pas coupuble).

An action having been brought in the Marine court of New York to recover a claim for rent against the sureties of a prominent political club, it was urged in defence that all contracts for the payment of money for election purposes were void, as contravening the election law. The Judge coincided with this position, and decided accordingly, dismissing the complaint with costs. Political bodies must be prepared after this to pay their way in advances in view of such a varyating defense and vance, as, in view of such a vexatious defense as is here set up, they cannot expect to be favored with any considerable amount of credit.

Horrible Brutality by a Vampire! — A case of the most horrible brutality is related to us as having occurred at Queen and Shackamaxon streets, on Saturday night, about 7 o'clock, by a driver of one of Glenat's Richmond line of omnibuses. A horse be-came stubborn, and in order to force him along, this brute in human form actually tied a rope to the horse's tongue, and dragged it literally from its socket! The poor beast was then forced to Rich-mond, and this cowardly vampire was suffered to

remain at large. Remarkably Short Passage .- Mr. Ogden's ship Dreadnought, commanded by Capt. Samuels, arrived yesterday from Liverpool, in 21 days' passage, Capt. S. left Liverpool Jan. 17th, and passed Cape Clear on the 22d, making the run from laud to land OFFICIAL.

How TO FOIL THE "GARROTERS."-Rev. Joseph Kingsmill, chaplain of the model prison at Penton-ville, England, gives the following directions for resisting an attack of the villainous garroters, who are frightening the good people of some of our large cities just now by the boldness of their robberies and the ferocity of their assaults:

"The best way to foil the attack is to press down the clin to the chest at the first perception of danger as rapidly and firmly as possible, so as to allow the lungs full play, and then to make good use of them, men and women alike screaming lustily. At a good shout the robbers will run, and all the faster if the attacked turn pursuer and assist in the capture.

Abolition'st Caught.—On Wednesday night, our efficient marshal, Mr. B. F. Wilkinson, arrested a man named lt. J. Tiner for tampering with, or endeavoring to run to a free State, some of the slaves employed in the stemmery of Mr. Louis Piderit, of this city. Tiner is uow in jail awaiting the action of the criminal court upon his case.

The following is a specimen of a thousand tesinionials, voluntarily offered during the last week, in favor of Porter's Oriental Life Liniment:

Dr. R. D. Porter—
Sin: Having been induced to purchase several bottles of your Oriental Life Liniment, by the many valuable recipes which you publish, I was persuaded to give it a trial in frost-bites and fresh cuts and wounds, which I found essentially beneficial. My brother has also tried it in diseases of horses e case where the left hip was shrinking away, pro-cing stiffness of the entire limb, rendering the animal almost useless-has used but one bottle and part of a second, and assured me it had almost effected a enre. I have no hesitancy in recommending it, and believe it is a valuable remedy in the diseases attending man or beast, for which you offer it to the public.

POLICE PROCEEDINGS .- Friday, Feb. 13 .- "Good Friday" again, judging by the small docket and the limited number of spectators. Jas. Morris, who resides up town, was found on Eighth street yesterday evening unconscious of his whereabouts. He is a hard-working man, and was sent home to his family, who are very clever people.

Christian Beichler swore that he was afraid of John Murray. This couple reside near Main and Eleventh streets, and yesterday had a difficulty coneerning the right of passage up an alley. They were about to settle it amicably, when the women interfered and widened the breach of their quarrelling. Murray was required to give his own recognizance in \$200 to keep the peace.

A party of four young men, engaged in a difficulty on the corner of Sixth and Jefferson streets last night, were discharged without being brought to trial. The court itself was a witness of the disorderly transaction.

We are authorized by the court to state that one o'clock at night and not ten is the hour after which all persons found on the streets will be arrested and required to give bail.

Gentlemen should bear in mind that the ball of Kentucky Tribe No. 4, I. O. R. M., will take place at the Odd Fellows' Hall to-night. Extensive preparations have been made for it, and it will doubtless be a most delightful entertainment.

MR. MERIAM HEARD FROM .- Mr. Meriam, who never feels the cold, has been heard from, among the mountains of New England, enjoying the sultry atmosphere in summer elothing. He tells all about it in the following letter addressed to the New York Courier:

The cold is delightful; at Littleton, N. H., it is at 24 degrees below zero; at Linden, 18 degrees below; and Danville, 12 degrees below zero. I can enjoy it wonderfully, and, with my summer dress, I have more warmth of body and flow of thought than those who are clothed in furs. I have not even felt the cold in all my tour. Saturday week was a cold day in this section of the country—the cold ranging from 65, 56, 46, 40, and 32 degrees below zero. The mercury thermometers become useless at about

The inercury thermometers become useless at about 42 degrees below zero, the mercury becoming solid. Last Saturday I was out in a snow storm nearly all day. About a foot of snow fell, and I enjoyed it more than any snow storm for a long while.

A letter from Washington says:

The Dallas-Clarendon treaty has been rejected by a large vote, or, in other words, recommitted to the Committee on Foreign Relations, which sends the document back to its originators for amendment.

Several intimate friends of Mr. Dallas say he will at once resign his position.

The Secretary of War has determined to send a new regiment to California early in the spring, a part to go across the plains for the protection of emigrants.

I learn that the Decatur has been ordered by the Secretary of the Navy from San Francisco to Panama, and that her officers are to be relieved. They will return by the Isthmus route.
While the Chaplain of the Senate was performing

While the Chaplain of the Senate was performing his duty to-day, a man, evidently insane, mistaking him for the presiding oflicer, approached his desk and held up his hand as if subsc.ibing to the oath of office. The prayer concluded, the stranger, usurping the seal, prepared to enter upon legislatiou; but the officers ejected him, notwithstanding his earnest protest against the violation of his Senatorial rights.

Considerable excitement exists at Richmond, Sta Considerable excitement exists at Richmond, Staten Island, New York, growing out of a difficulty among the congregation and vestrymen of St. Andrew's (Episcopal) Church at that place. After the death of its former Rector, Rev. Mr. Moore, the Vestry elected a Rev. Mr. Irving to supply his place, in the face of the opposition, however (it is said,) of many of the congregation. On Thursday last things came to a crisis—the Bishop having come down and regularly instituted the objectionable pastor. A protest against this proceeding on the part of the assistant Rector was then presented. The dissatisfied portion of the congregation thereupon of the assistant Rector was then preswithdrew from the church, and are now busy making a case for the courts. St. Andrew's, it should be added, has an endowment for the support of the Rector of \$5,000 per annum, and is therefore considered one of the best "livings" in the discess. But for this fact it is doubtful whether there would

Seduction by a Femule.—A young lady named Mary Davis, who is eighteen years of age, and belongs in this city, has been arrested in Ballston, charged with the seduction of a precocious son of Mr. Henry Clark, of Albany, aged sixteen years. The young lady induced the boy to clope with her, and they passed as brother and sister. She treated him with the most loving-kindness, and footed all the bills at the hotel where they were stoming. the bills at the hotel where they were stopping. The poor young gentleman is quite disconsolate at the arrest of his sweetheart; tears his hair, and swears that he will drown himself in the cistern if she is punished. Poor little Lothario!

RENCONTRE.-We understand that two of our pork merchants—a Kentuckian and a Canadian—got into a dispute at the Richmond House yesterday afternoon in regard to certain pork transactions, which had been for some time pending between them, to the dissatisfaction of the former, which resulted in the Kentuckian slapping the face of the Ca-nadian. The Canadian, probably deeming discre-tion the better part of valor, did not retaliate, but quietly withdrew. A sequel to the affair is looked for.—Chicago Journal.

THIRTY-FOURTH CONGRESS-SECOND SESSION. Thursday's Proceedings Concluded.

WASHINGTON, Feb. 12, P. M. Senator Wilson offered a resolution which was adopted, instructing the Committee on the Post Offee to inquire into the causes of the repeated failure of the mails between New York and Washington thing the pre cat session, and report what legisla-

tion, if any, is necessary to remedy the evil.

Mr. Pearce offered a resolution which was adopted, directing the presiding officer to appoint a committee of three to make the necessary arrangements for the reception and inauguration of the President

Mr. Crittenden offered a joint resolution that the electoral vote of Wisconsin in the late Presidential election, being given on a day different from that prescribed by law, was therefore null, and ought not have been admitted and juclided in the count of

Mr. Thompson, of Kentucky, said Wisconsin was like the horse which had been distanced in the race and came in behind time. Her vote should not be Mr. Crittenden argued that it was important to

determine whether the vote should be counted. For a case might hereafter arise when the result of the Presidential election would depend upon a similar event and there could be no better time than now for settling that question.

After brief debate the resolution was tabled.

The Senate concurred in the House resolution for the appointment of a committee to inform Messrs. Bachanan and Breckinridge of their election.

The Senate then adjourned, House.—After an ineffectual motion by Mr. Wal-bridge to lay the resolution on the table, it was Mr. Dunn offered a resolution declaring James

Buchanan and John C. Breckinridge duly elected, and further, that the vote of Wisconsin could not be counted without a violation of the provisions of the Constitution, not having been cast on the day desig-

The Speaker declared the resolution out of order, the journal showing the declaration of the election of a President and Vice President was made yester-To receive the resolution would disaffirm that Besides the House had constitutionally approved the journal.

Mr. Dunn said it should be distinctly stated

whether the vote of Wisconsin was counted or not.
Mr. Stanton moved the correction of the journal
so as to show that.

Mr. Orr moved that the vote of Wisconsin be rejected; that the President of the Senate ruled the motion out of order, and that while both Houses on motion of a Senator, the Senate retired for

consultation, and in that manner the convention was broken up. The House sustained the Speaker's decision. The vote was then announced and the motion made yesterday by Aiken to lay on the table.

The resolution reported from the Committee on Elections declaring Mr. Whitfield not entitled to his seat as delegate from Kansas. The motion was megatived by two majority.

Further consideration of the subject postponed to Saturday week. Resolution adopted to close the debate on the Tariff bill on Mouday next.

House went iuto Committee of the Whole on that

mbject.
Mr. Demitt spoke approvingly of the report of the Secretary of the Treasury who had proposed a reduction of the revenue by the enlargement of the free list, with such articles as are used by the manafacturers of the country. The legislation heretofore on wool has had the effect to treble importation of wooleng goods and stop 344 ests of medicary and of woolen goods and stop 344 sets of machinery and 1800 looms. If any member of Congress would call upon him at Willard's Hotel and show him that he apon him at Willard's Hotel and show him that he wears an American broadcloth coat, he would tender to him the best hospitality the establishment affords. [Laughter]. He spoke from an experience of forty years in working mills inside and out, and he maintained that if our mills should be set in motiou the demand for wool will increase its price, while the manufactured article will be cheaped.

Mr. Eustis said the gentleman had spoken as abough the Government would not want surplus money in the Treasury, as if Government had ful-

money in the Treasury, as if Government had ful-alled all the objects for which it was instituted, but this was not so, as the French spoliation and other chims remain unsettled, rivers require improvement and the navy enlargement. In the course of his remarks he said: Louisiana asks no favor, but demands while other interests are protected that sugar

shall not be neglected.

Mr. Covode, speaking from the experience of 80 years, argued that the difficulties of manufactuers are not to be overcome by taking the duty off of foreign wool, but on the contrary, they will be insed as the effect would be to lesson production thome. He spoke of the iron interest of Pennsyl-rama, and advocated a protective policy generally. The Committee then rose. at home.

Mr. Colfax presented a resolution of the Legisla-ture of Indiana, asking that sugar be admitted duty

The House then adjourned.

WASHINGTON, Feb. 12.

In the event of the failure of Congress to pass bill to reduce the revenue, Mr. Campbell, o Ohio, will press forward a motion, now under Ohio, will press forward a motion, now under consideration in the Committee of Ways and Means, depositing the revenue, reserving two millions of dollars, with the several States, in proportion to the Federal ratio of representation, or about \$75,000 for each member. To the Editors of the Louisville Journal:

THE PENINSULAR STATE-MICHIGAN GOSSIP. COLDWATER, MICHIGAN, February 2, 1857. Concelving that a gossipping letter from Michigan, one of the present lee-bound satellites of our "glorious Federal Luminary," written by a native Kentuckina, may not prove unacceptable to your numerous readers, emboldens me to chronicle "passing events" in the "Peniusular Stata"

State."

The village of Coldwater is situated on the N. J. & S. M. Raifroad, about 185 miles from Chicago, and 30 miles from Toledo, Ohio. It is situated on a level plain or prarie, well laid out, with wide, well graded streets, and possessing many fine huilding locations, Its present population is about 4,000. The Lieutenant Governor resides in this vilege.

about 4,000. The Lieuteuant Governor resides in this place.

The Legislature has been in session about three weeks, and, as you are already aware, has elected Zach, Chauder, of Detroit, to supersede Gen, Cass in the U. S. Senate, Mr. C. is a merchant of Detroit, a man of fair abilities in a commercial point of view, and was the Guberna torial standard-bearer of the Whig party in '52. He subsequently joined the Republican party for the sake of the spoils, and has reaped the reward of his treachery.

There is some talk among the "assembled wisdom" of creating another State out of that portion of Michigan designated as ONTONAGON—the State thus created to be so called. A bill to that effect is before the prescut Legislature.

ture. I find, during my residence of two months in this place, that the underground railroad is in full blast in this place, that the underground railroad is in full blast in this Place. Not long since several fuglitives from Kentucky were "passed" through this village ou their way to Canada, their owner arriving one day too late. Several instances of like character have, as I am informed, transpired withlu the past six months.

owner arriving one asy to have the character have, at I am informed, transpired withlu the past six months.

I was forcibly struck with the peculiarities, characterities, and sectional prejudices of the people of Michigan from those of the South. Their view upon our justimizing, and capecially that of slavery bave become so warped and perverted from the legitimate channel of reason and purities, by the permicious counsels of designing demagogues and deluded fanatics, that a large majority of the masses believe slavery in the South to be removed at least ten degrees helow actual barbarism. This is all wrong. It is as unjust to the North as it is to the South. There is no carthly necessity for this bitter hate and animosity between different individuals of different sections of the Union. The great bug-hear of a dissolution of the Union was originally conserved in rum-holes, and will, as a natural consequence, evaporate in smoke. But enough of slavery and politics.

queuee, evaporate in smoke. But enough of slavery and positics.

The prevailing fashion for ladies' dresses—that is, the criuoline or hoops—is favored with a vast patronage in this place. Our sidewalks, unfortunately, are very unrow, and at this season of the year generally coated with ice the consequence of which is many contretemps in the shape of dilapidated criuolines.

The ladies of Coldwater are, like the young gents, decidedly a "fast" set. And in this you would most cordially agree with me, could you hut see the brilliant array of beauty and fashion which I daily sed dashing through our streets, with a "fash" cutter and a "two-torty" nag, the fair driver holding the "ribbons" like a regular Jeliu.

Business operations in the upper portion of this State, and also in the Superior copper country, are stagmant during the present "cold spell." We have, in this vicinity, only seen noother-earth at short futervals, and in out of the way places, during the past two mouth——the thermometer ranging, meanwhile, from 8 to 15 degrees below the freezing point. Navigation on the lake's is, of course, entirely suspended.

The State is irredeemably Black Republican of the

point. Navigation on the takes is, or course, enurely pended.

be State is irredeemably Black Republican of the peat dye, and will, in all probability, give a larger pority for the Republican party at the next Presidential ction than it did last year. The present population of State chritides them to a representation in the National silecture of eight year.

the State Carities them to a representation in the National Legislature of eight votes.

There will be quite a large emigration from this State on the opening of spring into Kansas Torrinory. The South will have to use their most stremuous endeavors to circumvent the machinatious of Northern wire-workers to make Kansasa slave State. Let them see to it.

Truly, yours,

G. M. R.

Now, I would remark that between the ferries of Juffersonville and New Albany there is scarcely a comparison. The latter never did and never will do half the business of the former. The people from the back country who go to New Albany go there to trade and not to cross the river. The reverse is the case with those who come to Jeffersonville; an overwhelming majority of them come here with the in-tention of crossing over to Louisville.

New Albany does business independent of Lou-

New Albany does business independent of Lou-isville. She furnishes a market for the produce of the surrounding country in exchange, for which she supplies dry goods and groceries to any amount. This is not the case with Jeffersonville. Hence the people who bring produce to Jeffersonville expect to dispose of it in Louisville. Besides this, the freight brought by the railroad to New Albany is not intended for Louisville, but either for that place alone or for shipment down the river. Those facts will explain the reason why two ferries are not pro-

alone or for shipment down the river. Those facts will explain the reason why two ferries are not profitable at New Albany.

It is ideal to suppose that the crossing between Jeffersonville and Louisville will either remain what it now is or diminish. I have resided in this place nearly thirty years, and have seen it increase least thirty fold. This increase has been going on from year to year until at the present time, it is impossible for two boats, in any condition of the river, to do the ferrying without vexatious detention. If to do the ferrying without vexatious detention. If your correspondent could be on our wharf for a series of days and witness the contention among the teamsters, about who should go on the boat and who should be left, he would no doubt modify his opinions. I have been eye-witness of these contentions,

mounting occassionally to fights.

It has moreover become dangerous for light car-riages to go on the boats. The crowd of heavy riages to go on the boats. The crowd of heavy wagons is so great that they are in danger of being crushed to pieces. There should be a boat exclusively for this class of vehicles. The large freight wagons might be lauded opposite Jeffersonville just as well as at the terminus of Second street. This would not only save time, but be safer and more convenient for light carriages and foot passengers, lncrease the faculties for crossing and the business will increase in the same ratio. If a ferry with gross receipts amounting to two hundred dollars per day is not profitable the fault is in the management day is not profitable the fault is in the management of its finances. Upon calm reflection (I am of the opinion) that another ferry will not only be profitable, but is the only means of ensuring expedition and comparage to the public and convenience to the public.

HOG PACKING ON THE CUMBERLAND. - The Clarksville Chronicle gives the following statement of the hog business on the Cumberland river:

Number killed at Tric'es, 6,955; weight (net total) The product of these 6,955 hog.

The product of these 6,955 hog, was as follows: 2,961 bbls. mess pork; 9 bbls M. O.; 152 bbls rump; 175,880 bbs leaf-lard; 41,600 bbs head-lard; 36,228 bbs gut-lard; 26,318 bbs grease.

The averages for hog was of leaf-lard 25.30 bbs; of head-lard, 6 lbs; of gut-lard 5.20 lbs; and of grease 2 78 bbs.

3.78 lbs.

The number of hogs killed at this place, during the same time, is 8,860; weight (nett total) 1,927,725; average nett weight, per hog, 218,70 lb. This is 1,905 more hogs than were killed at Trice's, and the excess in weight is 426,761 lbs. The excess of the average weight, here is 1.50 p log.

We have not been furnished with the full product

We have not been furnished with the full product of the killing here, but a calculation close enough for ordinary purposes may easily be made from the figures we have given the proportionate product at both places being nearly the same.

SUICIDE.-A letter from Philadelphia, dated 9th

Mr. Goorge W. Watson, the celebrated carriage huilder, yesterday morning, committed suicide. For a year or more past he has been an inmate of the Pennsylvania Institution for the Insane, in West Philadelphia. Mr. Watson was taken yesterday morning, by one of the keepers of the Institution, to a larther shop under the Ohio Hotel. Market to a barber shop, under the Ohio Hotel, Market street, West Philadelphia, to get shaved. He ap-peared at the time quite calm and rational, and no violence was apprehended from him. While being shaved he maintained his composure, and arose when it was finished and walked to the wash bowl. After washing himself he seized a razor, and before his hand could be arrested had cut his throat. Death ensued in a few minutes. The deceased at one time was one of our most respectable citizens, and accumulated in the prosecution of his business

[London, Jan. 23, 1*57.]

The effect of the China intelligence on the London teamarket has been a further rise in tea of one penny (3 cts.) per pound.

The question which still occupies the greatest attention in the greatest attention in the greatest expected in the probability of an early return of the Bank of Eugland to a bigher rate of discount. Sluce the reduction was made to 6 per cent. on the 15th of December, there has been a constant tendency to a renewal of gold shipments to the continent, chiefly for the purchase of silver for transmission to India. During the last few days this action has increased, and it is therefore considered certain that, nulses some large arrivals shall meanwhile occur from Australia, the Bank will hardly delay for more than a week or two the adoption of some preventive measures.

A circumstance which adds to this prospect is that the Bank of France are understood also to be again suffering a reduction of builtion. The renewed efflux is not at present believed to be very great, but there are signs that its likely to be continuous, and as a very little pressure would suffice to bring about another paule; like that which was witnessed two months ago, the position is watched with considerable anxlety. Amongst the maddest proceedings of the French speculators the recent loan of \$15,000,000 to the Spanish Government has been most prominent, and there is little doubt that it will add considerably to the inconveniences of the period.

It must be mentioned, however, that, although much is thus presented to shut out the hope of an easier money market, there are everal contingencies which may operate to prevent the apprehended increase of pressure. Within a week from this date an extraordinarily large supply of silver is expected from Mexico; another heavy arrival will at the same time being received from China, and these, of course, we just as useful in their financial effect as if the same v

to observe the almost total ladificrence with which it is recarded in the great manufacturing marts throughout the kinsdom.

With the exception of the building trade, which has been greatly overdone for several years past, and which is now sustaining a severe reaction, there is scarcely a brauch of Industry in which there is not full employment; and this employment, so far from being carried on with a view to a speculative accumulation of stocks, barely results in satisfying the daily demand. Hence, when an Increase is sunounced in the rate for money, the manufacturer, instead of heing driven to part with his goods at a sacrifice, which would be the case if he held them on speculation, actually advances his prices to meet the increased charge to which he is thus subjected. It is merely a matter of adjustment, involving little clse than the trouble of a few fresh calculations, and consequently the changes which at other lines would have created excitement all over the country are now scarcely considered worthy of a remark. In the London stock exchange, however, their lutinence hery different. Just to the extent that the extraordinary profits of trado render it worth while for the commercial body to increase their biddings for the use of money, the indisposition to seek the old fashioued channels of investment becomes manifest. The concotors of companies, therefore, find their trade utterly ruined. If they promise 5, 6, or 7 per cent, it is only as much as can be obtained by the public in other ways without risk, and if they promise inore they are regarded with suspicion. In this state of atfairs, there is, happilly, little encouragement for the Russian railway plans. Within the past fortnight, some persons from St. Peterburg are understood to have privately visited London with the object of seeing whether the time was ripe, and they are likely to carry back to the Czar a very dismal account of their chances.

COMMOTION AT THE WHITE HOUSE,-The Wash ington correspondent of the New York Evening Post says that there was a small flutter at the White House when District Actorney, John McKeon, telegraphed that Faben's counsel had produced a letter frauked by the President, and implicating that fractions of the President, and implicating that functions of the President, and implicating the President of tionary in the Central American speculations of General Walker's "Director of Colonization." In-Structions were at once sent from Attorney-General Cushing's office to Mr. McKeon, by order of the Cushing's office to Mr. McKeon, by order of the President, authorizing his assent to the production in Court of all letters or documents implicating any functionary of Government in the business

The story goes that the letter aforesaid is a simple acknowledgment, on the part of Mr. Sidney Webster, the President's private secretary, of the present of certain shares of stock in the Kinney (not the Walker) enterprise, in behalf of himself and others not named. Who these others are is not tasted but these reasons to the secretary bear and the secretary are secretary and the secretar stated, but they may have been anyhody else as well as the President. I understaud that Mr. Webster, who has written a letter of like character with the President's to Mr. McKeen, says that the President was entirely ignorant of the use of his Trank in the instance referred to; but, being out of letter stamps, he (Mr. W.) inconsiderately enclosed the epistle in one of the President's, which happened to be lying on the table.

ed to be lying on the table.

Subsequently, however, when the Kinney enterprise, which was purely land speculation, unjustly fell into suspicion as a military expedition of contravention of the neutrality laws, Mr. Webster voluntarily surrendered and returned his stock to Mr.

ARREST OF AN ALLEGED FUGITIVE SLAVE.—A negro man was arrested in Bloomington, a few days negro man was arrested in Bloomington, a few days since, and was yesterday brought to this city ou the cars, on the suspicion that he was a runaway slave. It is said, however, that he does not fully answer the description of the negro for whom he was arrested. He professes to hail from Gibson county, and, when interrogated by a gentleman well acquainted in that county, he gave satisfactory answers, which, it is presumed, a slave could not do. He says he is free, and that is the general impression of those who came down on the cars with him. The man who arrested him is said to be named Atkinson. We believe the negro was taken across the river.—New Albany Ledger. river .- New Albany Ledger.

DAILY REVIEW OF THE MARKET, LOUISVILLE, February 13. There has been for the last day or two a very activ

mand for sugar, which has resulted in heavy sales. The provision market has been very quiet. We have no change in the money market to notice. Exchange unaltered. In provisions a sale of 400 bbls mess pork at \$18 50 and 1,000 casks sugar-cured hams (Atkinson, Thomas, & Co. brand and cured by Lewl Stagg) for shipment East on priwate terms. We have no large sales to notice in bacon, though heavy shipments have been made at prices current some weeks ago when it was bought. The largest bouse has sold, since new bacon first came into market, 700 casks. Very little arriving from the country, and shoulders bring 8% @8%c and clear sides and hams 10c from wagons. This description of bacou is in demand for the home market. A sale of 500 kegs prime lard, a day or two ago hut not before reported, at 121/c. A sale of 10 casks old clear eides at 10c,

packages extra. The sales of sugar vesterday foot up 230 hhds, of which 215 hhds fair to choice were sold at 1114@11%c, the bulk of the sales being at 11%c, and 15 hhds very low grade at 10%c. Light sales of refined at 10%c. In molasses a few small sales to the trade at 70c for hhls. Little doing in coffee; about 75 bags Rio were sold at 11@11%c. Small sales of rice at 5%c.

Sales of 25 tobacco, including 15 old crop-9 at \$9@9 70. 2 at \$11 and \$11 20, 3 at \$13 10@\$13 20, and 1 review at \$13 65, and 10 hhds new crop at \$7 90, \$9 70, \$9 85, \$9 \$9 30, \$10 35, \$10 60, \$11 20, \$12 35, and \$12 65. Sales of 200 sacks white shelled corn from store at 62c

sacks returned. Oats 50@55c.
Flour market is very quiet, with sales from store by the dray-load at \$5 60@\$5 65 for good superfine. Wheat \$1 10 @\$1 15 and very little arriving.

There has been a very active business doing in all kinds of whisky. Heavy shipments of rectified were made, and the raw received had been engaged previous to arrival. A sale yesterday of 40 hhis, all that was on market, at 23%c. A corresponding good demand has prevailed for Bourbon and copper-distilled, with sales yesterday of 60 bbls new Bourbon at 66c, 33 bbls two-year old at \$1 02, 65 hbls copper-distilled from store to the trade at 70e, and 34 hhls from the country at 65c.

A sale of 20 bales middling cotton at 12%c.

A sale of 16 hales new 21/2-hushel gunny bags at 13c. Feathers are in good and they have advanced; we now note them 46@47c.

Pound freights to New Orleans 35c & hundred, pork 80c, ard in tierces Soc, and whisky \$1 25. To way points an advance on these rates. Sheep 75c P head, mules \$7, and horses and cattle \$8 P head.

CINCINNATI, February 12, P. M. Flour market closed quiet but steady-sales of 400 bbls at \$5 35; receipts about 1,000 \$7 day, with only a moderate de nand for export. Barley-there is more doing hut without hange in prices. Whisky market is dull to-day-sales of .400 bbls at 23c. Cheese is active and scarce at 11@11%c for shipping qualities. Butter is dull without change in the price. Clover seed is firm—sales of 150 hhls at \$7. Proviions are quiet, the advices from New York and New Orleans caused the market to close flat, and we heard of no sales of importance. Groceries firm and active.

NEW YORK, February 12, P. M. Cotton market is active and firmer-sales of 5,000 hales. Flour steady—sales of 8,500 bbls. Wheat buoyant—sales of 10,000 bash. Corn dull and declining—sales of 10,000 bash. fork dull hat steady. Rice firm. Sugar steady. Tobacco firm at 11@17c. Freights heavy.

AYER'S CHERRY PECTORAL-For the rapid Cough, Asthma, and Consumption, is unlversally known as the best remedy ever yet discovered for every variety of Pulmonary disease. So wide is the field of its assetutuess, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known who bave been restored from alarming and even desperate diseases of the lungs by its nee. When once tried its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. By its timely e many, nay almost all attacks of disease upon the lungs or throat, are arrested and thus are saved a thousands every year from a premature grave. No family should be without it, and those who do neglect to provide themselves with a remedy which wards off this dangerous class of discases will have cause to deplore it when it is too late. Proofs of the surprising efficacy of the Cherry Pectoral need not be given to the American people—they have living proofs in every neighborhood. But those who wish to read the statements of those whose whole health has heen restored, and whose lives have been saved by its use, will find them in my American Almanac, which the agent below named has to furnish gratls for every one.
